

JAM Folder Protector

Originally developed as “FAT Folder Protector” in 2010, Abien Fred Agarap re-developed and renamed the software to “JAM Folder Protector” in 2012 for the Regional Science Fair of the same year.

The purpose of the project was to provide personal folder security at the reach of simple computer users. Should you need any form assistance in relation with the JAM Folder Protector, you may send the developer a message via e-mail: abienfred.agarap@yahoo.com

System Requirements:

- Processor: 1 GHz
- RAM: 512 MB
- Operating System: Microsoft Windows Vista SP2, Windows 7 SP1, Windows 8, and Windows 8.1
- Disk space: 5 MB
- .NET Framework 4.5

How to use?

1. At first run, the program will ask you to set your password (Image 1).

3. After entering the correct password, the main program will execute (Image 3).
 - a. “Browse” button. This is used to select the folder you want to lock using the JAM software (Image 3.a).
 - b. “Lock” button. As the name itself says, this is used to lock the folder you have previously selected with the “Browse” button.
 - c. “Unlock” button. This is the counter-part of the abovementioned button.
 - d. “Recent Folders”. This contains the folders you have selected using the “Browse” button. A folder being listed here is not necessarily locked by the JAM software.
